

BRACELETS

Elastic bracelets from Carezze collection are available in different sizes to ensure the best fit. Finding the right size is simple: just print the wrist measuring tool provided below on an A4 sheet, cut it out, and place it around your wrist. Keep in mind that the thickness of the paper is much less than that of a bracelet, so we recommend adding half a centimeter to the measured size.

Be sure to print at 100% scale and check that the proportions are correct using the reference measurement provided below.
